

Elex-R

Integrated amplifier

We are very proud to announce the latest product from Rega Research. The Elex-R is a sublime blend of the Brio-R design with the power circuits and advanced phono stage of the Elicit-R. Rega's engineers have achieved the perfect balance of power, control and dynamics, delivering a performance that always puts the music first. You will find plenty of connectivity options allowing complete flexibility and integration within the rest of the Rega range.

Available to order now.

Delivery June 2014
